A Problem Solving Approach to Mathematics for Elementary School Teachers (11th Edition) By Rick Billstein, Shlomo Libeskind, Johnny Lott

More than 350,000 students have prepared for teaching mathematics with **A Problem Solving Approach to Mathematics for Elementary School Teachers** since its first edition, and it remains the gold standard today. This text not only helps students learn the material by promoting active learning and developing skills and concepts—it also provides an invaluable reference to future teachers by including professional development features and discussions of today's standards.

The **Eleventh Edition** is streamlined to keep students focused on what is most important. The **Common Core State Standards (CCSS)** have been integrated into the book to keep current with educational developments. The **Annotated Instructor's Edition** offers new **Integrating Mathematics and Pedagogy (IMAP)** video annotations, in addition to activity manual and e-manipulative CD annotations, to make it easier to incorporate active learning into your course. **MyMathLab®** is available to offer auto-graded exercises, course management, and classroom resources for future teachers.

To see available supplements that will enliven your course with activities, classroom videos, and professional development for future teachers, visit www.pearsonhighered.com/teachingmath

Editorial Review

About the Author

Rick Billstein is a Professor of Mathematics at the University of Montana. He has worked in mathematics teacher education at this university for over 40 years and his current research is in the areas of curriculum development and mathematics teacher education. He teaches courses for future teachers in the Mathematics Department. He served as the site director for the *Show-Me Project*, an NSF-funded project supporting the dissemination and implementation of standards-based middle grades mathematics curricula. He worked on the NSF grant *Tinker Plots* to develop new data analysis software and he serves on the Advisory Boards for several other national projects. From 1992-1997, he directed the NSF-funded *Six Through Eight Mathematics* (STEM) middle school mathematics curriculum project and is now directing the *Middle Grades MATHThematics Phase II Project*. Dr. Billstein has published articles in over 20 different journals, and has co-authored over 40 books, including ten editions of *A Problem Solving Approach to Mathematics for Elementary Teachers*. He typically does about 25 regional and national presentations per year and has worked in mathematics education at the international level. He presently serves on the Editorial Board of NCTM's *Mathematics Teaching in the Middle School*. Dr. Billstein was recently awarded the George M. Dennison Presidential Faculty Award for Distinguished Accomplishment at the University of Montana.

Shlomo Libeskind is a professor in the mathematics department at the University of Oregon in Eugene, Oregon, and has been responsible there for the mathematics teaching major since 1986. In addition to teaching and advising pre-service and in-service teachers, Dr. Libeskind has extensive writing experience (books, articles, and workshop materials) as well as in directing mathematics education projects. In teaching and in writing, Dr. Libeskind uses a heuristic approach to problem solving and proof; in this approach the reasonableness of each step in a solution or proof is emphasized along with a discussion on why one direction might be more promising than another. As part of his focus on the improvement of the teaching of mathematics, Dr. Libeskind is also involved at many levels locally, nationally, and worldwide in the evaluation of mathematics teacher preparation programs. In his home state, he is actively involved in schools and councils, as well as in reviewing materials for the state standards for college admission. Most recently (spring 2008) he visited teacher colleges in Israel as a Fulbright Fellow. During this visit he conducted observations and critiques of the preparation of mathematics teachers at several colleges in Northern Israel. Dr. Libeskind received his Bachelor's and Master's Degrees in Mathematics at the Technion (Israel Institute of Technology) and his PhD in Mathematics at the University of Wisconsin, Madison.

Johnny W. Lott began his teaching career in the public schools of DeKalb County, Georgia, outside Atlanta. There he taught mathematics in grades 8-12. He also taught one year at the Westminster Schools, grades 9-12, and one year in the Pelican, Alaska, school, grades 6-12. Johnny is the co-author of several books and has written numerous articles and other essays in the "Arithmetic Teacher", "Teaching Children Mathematics", "The Mathematics Teacher", "School Science and Mathematics", "Student Math Notes", and "Mathematics Education Dialogues". He was the Project Manager for the "Figure This!" publications and website developed by the National Council of Teachers of Mathematics (NCTM) and was project co-director of the State Systemic Initiative for Montana Mathematics and Science (SIMMS) Project. He has served on many NCTM committees, has been a member of its Board of Directors, and was its president from April 2002-April 2004. Dr. Lott is Professor Emeritus from the Department of Mathematical Sciences at The University of Montana, having been a full professor. He is currently the Director of the Center for Excellence in Teaching and Learning, Professor of Mathematics, and Professor of Education at the University of

Mississippi. Additionally, he is on the Steering Committee of the Park City Mathematics Institute, works with the International Seminar, the Designing and Delivering Professional Development Seminar, and is editor for its high school publications. His doctorate is in mathematics education from Georgia State University.

Users Review

From reader reviews:

Richard Redd:

Book will be written, printed, or highlighted for everything. You can learn everything you want by a guide. Book has a different type. To be sure that book is important thing to bring us around the world. Alongside that you can your reading skill was fluently. A e-book A Problem Solving Approach to Mathematics for Elementary School Teachers (11th Edition) will make you to end up being smarter. You can feel considerably more confidence if you can know about every thing. But some of you think in which open or reading some sort of book make you bored. It is far from make you fun. Why they can be thought like that? Have you looking for best book or ideal book with you?

Elliott Preciado:

Reading can called brain hangout, why? Because while you are reading a book specially book entitled A Problem Solving Approach to Mathematics for Elementary School Teachers (11th Edition) the mind will drift away trough every dimension, wandering in every aspect that maybe unidentified for but surely will end up your mind friends. Imaging each and every word written in a reserve then become one application form conclusion and explanation in which maybe you never get ahead of. The A Problem Solving Approach to Mathematics for Elementary School Teachers (11th Edition) giving you another experience more than blown away your head but also giving you useful data for your better life in this era. So now let us explain to you the relaxing pattern here is your body and mind are going to be pleased when you are finished examining it, like winning an activity. Do you want to try this extraordinary wasting spare time activity?

Syble Mills:

The book untitled A Problem Solving Approach to Mathematics for Elementary School Teachers (11th Edition) contain a lot of information on this. The writer explains her idea with easy way. The language is very easy to understand all the people, so do not really worry, you can easy to read this. The book was written by famous author. The author provides you in the new era of literary works. You can easily read this book because you can please read on your smart phone, or model, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site and also order it. Have a nice examine.

Georgia Evans:

That e-book can make you to feel relax. This particular book A Problem Solving Approach to Mathematics for Elementary School Teachers (11th Edition) was colourful and of course has pictures on the website. As

we know that book A Problem Solving Approach to Mathematics for Elementary School Teachers (11th Edition) has many kinds or variety. Start from kids until teens. For example Naruto or Investigator Conan you can read and believe you are the character on there. Therefore not at all of book are generally make you bored, any it offers you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading this.
