Modeling, Estimation and Control: Festschrift in Honor of Giorgio Picci on the Occasion of his Sixty-Fifth Birthday (Lecture Notes in Control and Information Sciences) From Brand: Springer

This Festschrift is intended as a homage to our esteemed colleague, friend and maestro Giorgio Picci on the occasion of his sixty-fifth birthday. We have known Giorgio since our undergraduate studies at the University of Padova, where we first experienced his fascinating teaching in the class of System Identification. While progressing through the PhD program, then continuing to collaborate with him and eventually becoming colleagues, we have had many opportunities to appreciate the value of Giorgio as a professor and a scientist, and chiefly as a person. We learned a lot from him and we feel indebted for his scientific guidance, his constant support, encouragement and enthusiasm. For these reasons we are proud to dedicate this book to Giorgio. The articles in the volume will be presented by prominent researchers at the "International Conference on Modeling, Estimation and Control: A Symposium in Honor of Giorgio Picci on the Occasion of his Sixty-Fifth Birthday," to be held in Venice on October 4-5, 2007. The material covers a broad range of topics in mathematical systems theory, estimation, identification and control, reflecting the wide network of scientific relationships established during the last thirty years between the authors and Giorgio. Critical discussion of fundamental concepts, close collaboration on specific topics, joint research programs in this group of talented people have nourished the development of the field, where Giorgio has contributed to establishing several cornerstones.
