Social Multimedia Signals: A Signal Processing Approach to Social Network Phenomena

By Suman Deb Roy, Wenjun Zeng

Social Multimedia Signals: A Signal Processing Approach to Social Network Phenomena By Suman Deb Roy, Wenjun Zeng

This book provides a comprehensive coverage of the state-of-the-art in understanding media popularity and trends in online social networks through social multimedia signals. With insights from the study of popularity and sharing patterns of online media, trend spread in social media, social network analysis for multimedia and visualizing diffusion of media in online social networks. In particular, the book will address the following important issues: Understanding social network phenomena from a signal processing point of view; The existence and popularity of multimedia as shared and social media, how content or origin of sharing activity can affect its spread and popularity; The network-signal duality principle, i.e., how the signal tells us key properties of information diffusion in networks; The social signal penetration hypothesis, i.e., how the popularity of media in one domain can affect the popularity of media in another. The book will help researchers, developers and business (advertising/marketing) individuals to comprehend the potential in exploring social multimedia signals collected from social network data quantitatively from a signal processing perspective.

Editorial Review

From the Back Cover

Social Multimedia Signals is intended for those whose interest is to study the Social Web and develop automated tools to analyze it better. It is especially useful for researchers experienced with signal processing or multimedia analysis but have little exposure to social networks and social multimedia data. Those new to social multimedia should find the first chapters extremely useful to get a thorough look at how social data behaves. Conversely, social scientists should find useful the authors' introduction to several signal processing techniques that can be employed to manipulate large-scale social data. For those new to signal processing, Chapters 5, 6 and 7 will get readers underway with basic techniques for signal processing from social multimedia. Later chapters include a significant amount of material on machine learning for those interested in intelligent algorithms for the Social Web. The authors wrote this book in a balanced fashion, for multimedia researchers, social scientists, network scientists, data scientists who work with social web data, and professionals who use social media on a daily basis.

·   Explores how media popularity in one domain is determined by another domain;

·   Presents a granular look at social networks: micro, meso, and macro;

·   Examines finding hidden communities in social networks based on shared multimedia.

About the Author
Dr. Suman Deb Roy is a Data Scientist with Betaworks, NY Dr. Wenjun (Kevin) Zeng is a Professor at the Computer Science Dept. with the Univ. of Missouri, Columbia, MO, USA.

Users Review

From reader reviews:

Willene Choate:

What do you in relation to book? It is not important along? Or just adding material when you need something to explain what your own problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to do others business, it is make you feel bored faster. And you have spare time? What did you do? All people has many questions above. They need to answer that question since just their can do which. It said that about publication. Book is familiar in each person. Yes, it is appropriate. Because start from on guardería until university need this specific Social Multimedia Signals: A Signal Processing Approach to Social Network Phenomena to read.

Linda Young:

This Social Multimedia Signals: A Signal Processing Approach to Social Network Phenomena tend to be

reliable for you who want to certainly be a successful person, why. The reason of this Social Multimedia Signals: A Signal Processing Approach to Social Network Phenomena can be one of many great books you must have will be giving you more than just simple studying food but feed you actually with information that perhaps will shock your earlier knowledge. This book will be handy, you can bring it almost everywhere and whenever your conditions in the e-book and printed types. Beside that this Social Multimedia Signals: A Signal Processing Approach to Social Network Phenomena giving you an enormous of experience like rich vocabulary, giving you trial of critical thinking that we understand it useful in your day pastime. So , let's have it appreciate reading.

Kathleen Bosarge:

In this time globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of references to get information example: internet, newspapers, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. The actual book that recommended to you is Social Multimedia Signals: A Signal Processing Approach to Social Network Phenomena this book consist a lot of the information with the condition of this world now. That book was represented so why is the world has grown up. The dialect styles that writer require to explain it is easy to understand. The actual writer made some investigation when he makes this book. That is why this book suited all of you.

Casey Reeves:

What is your hobby? Have you heard in which question when you got college students? We believe that that question was given by teacher to the students. Many kinds of hobby, Every person has different hobby. So you know that little person like reading or as studying become their hobby. You should know that reading is very important and also book as to be the issue. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You discover good news or update in relation to something by book. Amount types of books that can you go onto be your object. One of them is Social Multimedia Signals: A Signal Processing Approach to Social Network Phenomena.
