## **Citizen's Right to the Digital City: Urban Interfaces, Activism, and Placemaking** From Springer

Edited by thought leaders in the fields of urban informatics and urban interaction design, this book brings together case studies and examples from around the world to discuss the role that urban interfaces, citizen action, and city making play in the quest to create and maintain not only secure and resilient, but productive, sustainable and viable urban environments. The book debates the impact of these trends on theory, policy and practice. The individual chapters are based on blind peer reviewed contributions by leading researchers working at the intersection of the social / cultural, technical / digital, and physical / spatial domains of urbanism scholarship. The book will appeal not only to researchers and students, but also to a vast number of practitioners in the private and public sector interested in accessible content that clearly and rigorously analyses the potential offered by urban interfaces, mobile technology, and location-based services in the context of engaging people with open, smart and participatory urban environments.

## **Editorial Review**

### Review

“The book is an interdisciplinary work, which brings urban planning and urbanisation, IT-development and informatics, financial issues and economics under the umbrella of spatial theory and geography. ... The volume presents different viewpoints and aspects on urban informatics and digital urbanism, what makes it a useful handbook with its thirteen individual but connected chapters for geographers, sociologists, economists and urbanists, who are working in ICT-based urban development and design.” (Gyula Nagy, Hungarian Geographical Bulletin, Vol. 65 (3), 2016)

### From the Back Cover

Edited by thought leaders in the fields of urban informatics and urban interaction design, this book brings together case studies and examples from around the world to discuss the role that urban interfaces, citizen action, and city making play in the quest to create and maintain not only secure and resilient, but productive, sustainable and viable urban environments. The book debates the impact of these trends on theory, policy and practice. The individual chapters are based on blind peer reviewed contributions by leading researchers working at the intersection of the social / cultural, technical / digital, and physical / spatial domains of urbanism scholarship. The book will appeal not only to researchers and students, but also to a vast number of practitioners in the private and public sector interested in accessible content that clearly and rigorously analyses the potential offered by urban interfaces, mobile technology, and location-based services in the context of engaging people with open, smart and participatory urban environments.

### About the Author

Professor Marcus Foth is founder and director of the Urban Informatics Research Lab, and Professor of Interactive & Visual Design in the School of Design, Creative Industries Faculty at Queensland University of Technology. Marcus' research focuses on the relationships between people, place and technology. He leads a cross-disciplinary team that develops practical approaches to complex urban problems. He adopts human-computer interaction and design methodologies to build engagement around emerging issues facing our cities. Marcus has authored and co-authored over 120 publications in journals, edited books, and conference proceedings.

Martin Brynskov, PhD, is associate professor in interaction technologies at the Department of Aesthetics and Communication at Aarhus University in Denmark. He is also research fellow at Participatory IT Centre (PIT) and Center for Advanced Visualization and Interaction (CAVI), director of the Digital Design Lab, co-founder of Smart Aarhus, and former director of the Civic Communication group at the Center for Digital Urban Living. He is the general chair of the Media Architecture Biennale 2012 and 2014. Working closely together with municipalities, artists, journalists, media organizations, and industrial partners, he investigates the consequences of digitization and explores new forms of mediation within a variety of domains with special focus on the role of social interaction, materials and interfaces. The research is mostly carried out as interventions and experiments in the wild, deploying prototypes and semi-permanent interactive systems.

Timo Ojala is professor of computer engineering at the Department of Electrical and Information

Engineering of the University of Oulu and the director of the MediaTeam Oulu research group. He received his M.Sc. (with honors) and Dr.Tech. degrees in 1992 and 1997, respectively, from the University of Oulu, Finland. He is the responsible director of the UrBan Interactions (UBI) program, which aims at building a functional prototype of future ubiquitous city in Oulu. He has authored about 100 international scientific publications on mobile multimedia, human computer interaction, networking and computer vision. He has served as the founding co-chair of the 1st International Conference on Mobile and Ubiquitous Multimedia (MUM 2002), the general chair of MUM 2007 conference and in the program committees of many international conferences and workshops.

Marcus Foth, PhD, is Professor of Urban Informatics in the QUT Design Lab, Creative Industries Faculty at Queensland University of Technology. He is also an Honorary Professor in the School of Communication and Culture at Aarhus University, Denmark. Professor Foth's research brings together people, place, and technology. His transdisciplinary work is at the international forefront of human-computer interaction research and development with a focus on smart cities, community engagement, media architecture, internet studies, ubiquitous computing, and sustainability. He has authored and co-authored over 180 publications in journals, edited books, and conference proceedings.

## **Users Review**

### **From reader reviews:**

#### **Rachel Garber:**

In this 21st centuries, people become competitive in most way. By being competitive now, people have do something to make these individuals survives, being in the middle of the particular crowded place and notice by simply surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Yep, by reading a e-book your ability to survive boost then having chance to stand up than other is high. For yourself who want to start reading some sort of book, we give you this kind of Citizen's Right to the Digital City: Urban Interfaces, Activism, and Placemaking book as starter and daily reading e-book. Why, because this book is more than just a book.

#### **Pamela Rhodes:**

Now a day individuals who Living in the era where everything reachable by interact with the internet and the resources inside can be true or not demand people to be aware of each information they get. How individuals to be smart in having any information nowadays? Of course the correct answer is reading a book. Examining a book can help men and women out of this uncertainty Information specifically this Citizen's Right to the Digital City: Urban Interfaces, Activism, and Placemaking book because this book offers you rich details and knowledge. Of course the knowledge in this book hundred percent guarantees there is no doubt in it you know.

#### **Marlin Brogan:**

Reading a publication can be one of a lot of action that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people fantastic. First reading a reserve will give you a lot of new data. When you read a book you will get new information since book is one of various ways to share the information or even their idea. Second, reading through a book will make you actually more imaginative.

When you studying a book especially fiction book the author will bring someone to imagine the story how the personas do it anything. Third, you may share your knowledge to others. When you read this Citizen's Right to the Digital City: Urban Interfaces, Activism, and Placemaking, it is possible to tells your family, friends in addition to soon about yours book. Your knowledge can inspire average, make them reading a reserve.

**Jaime McKenney:**

Reading a book for being new life style in this year; every people loves to go through a book. When you learn a book you can get a great deal of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what forms of book that you have read. If you want to get information about your research, you can read education books, but if you act like you want to entertain yourself read a fiction books, these kinds of us novel, comics, along with soon. The Citizen's Right to the Digital City: Urban Interfaces, Activism, and Placemaking offer you a new experience in reading a book.
