The Limits of Inference without Theory (Tjalling C. Koopmans Memorial Lectures) By Kenneth I. Wolpin

In this rigorous and well-crafted work, Kenneth Wolpin examines the role of theory in inferential empirical work in economics and the social sciences in general -- that is, any research that uses raw data to go beyond the mere statement of fact or the tabulation of statistics. He considers in particular the limits that eschewing the use of theory places on inference. Wolpin finds that the absence of theory in inferential work that addresses microeconomic issues is pervasive. That theory is unnecessary for inference is exemplified by the expression "let the data speak for themselves." This approach is often called "reduced form." A more nuanced view is based on the use of experiments or quasi-experiments to draw inferences. Atheoretical approaches stand in contrast to what is known as the structuralist approach, which requires that a researcher specify an explicit model of economic behavior -- that is, a theory. Wolpin offers a rigorous examination of both structuralist and nonstructuralist approaches. He first considers *ex ante* policy evaluation, highlighting the role of theory in the implementation of parametric and nonparametric estimation strategies. He illustrates these strategies with two examples, a wage tax and a school attendance subsidy, and summarizes the results from applications. He then presents a number of examples that illustrate the limits of inference without theory: the effect of unemployment benefits on unemployment duration; the effect of public welfare on women's labor market and demographic outcomes; the effect of school attainment on earnings; and a famous field experiment in education dealing with class size. Placing each example within the context of the broader literature, he contrasts them to recent work that relies on theory for inference.

Editorial Review

Review

A well-written treatise that examines the methodological debate within applied microeconomics on the proper role of theory. It uses unimpeachable substantive arguments and illustrations drawn mainly from Kenneth Wolpin's own stellar career.

(**Christopher J. Flinn**, Department of Economics, New York University; Senior Research Fellow, Collegio Carlo Alberto)

Kenneth Wolpin makes an original, sound, and persuasive argument for the importance of using theory in conducting empirical work.

(**Robert Moffitt**, Department of Economics, Johns Hopkins University)

Kenneth Wolpin is one of the deepest thinkers in labor economics. He has made pathbreaking contributions to the empirical study of labor markets. Many junior and senior researchers in the field will enjoy this book.

(**Gerard J. van den Berg**, Department of Economics, University of Mannheim)

About the Author

Kenneth I. Wolpin is Walter H. and Lenore C. Annenberg Professor in the Social Sciences at the University of Pennsylvania.

Users Review

From reader reviews:

Antoinette Hogg:

The book The Limits of Inference without Theory (Tjalling C. Koopmans Memorial Lectures) make one feel enjoy for your spare time. You should use to make your capable a lot more increase. Book can being your best friend when you getting tension or having big problem using your subject. If you can make reading a book The Limits of Inference without Theory (Tjalling C. Koopmans Memorial Lectures) to become your habit, you can get a lot more advantages, like add your own personal capable, increase your knowledge about some or all subjects. You are able to know everything if you like wide open and read a e-book The Limits of Inference without Theory (Tjalling C. Koopmans Memorial Lectures). Kinds of book are a lot of. It means that, science book or encyclopedia or other folks. So , how do you think about this reserve?

Eddie Bussell:

Precisely why? Because this The Limits of Inference without Theory (Tjalling C. Koopmans Memorial Lectures) is an unordinary book that the inside of the guide waiting for you to snap the idea but latter it will

surprise you with the secret that inside. Reading this book alongside it was fantastic author who else write the book in such incredible way makes the content inside of easier to understand, entertaining way but still convey the meaning fully. So , it is good for you for not hesitating having this ever again or you going to regret it. This book will give you a lot of positive aspects than the other book get such as help improving your skill and your critical thinking means. So , still want to hold off having that book? If I were being you I will go to the e-book store hurriedly.

Fernando Minaya:

Many people spending their period by playing outside having friends, fun activity using family or just watching TV all day long. You can have new activity to spend your whole day by studying a book. Ugh, ya think reading a book really can hard because you have to use the book everywhere? It alright you can have the e-book, taking everywhere you want in your Touch screen phone. Like The Limits of Inference without Theory (Tjalling C. Koopmans Memorial Lectures) which is finding the e-book version. So , why not try out this book? Let's notice.

Stacie Schneider:

As a student exactly feel bored to be able to reading. If their teacher asked them to go to the library or make summary for some guide, they are complained. Just tiny students that has reading's soul or real their interest. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading significantly. Any students feel that reading is not important, boring and also can't see colorful images on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this The Limits of Inference without Theory (Tjalling C. Koopmans Memorial Lectures) can make you feel more interested to read.
