**Archigram: Architecture without Architecture (MIT Press) By Simon Sadler**

In the 1960s, the architects of Britain's Archigram group and Archigram magazine turned away from conventional architecture to propose cities that move and houses worn like suits of clothes. In drawings inspired by pop art and psychedelia, architecture floated away, tethered by wires, gantries, tubes, and trucks. In *Archigram: Architecture without Architecture*, Simon Sadler argues that Archigram's sense of fun takes its place beside the other cultural agitants of the 1960s, originating attitudes and techniques that became standard for architects rethinking social space and building technology. The Archigram style was assembled from the Apollo missions, constructivism, biology, manufacturing, electronics, and popular culture, inspiring an architectural movement -- High Tech -- and influencing the postmodern and deconstructivist trends of the late twentieth century.

Although most Archigram projects were at the limits of possibility and remained unbuilt, the six architects at the center of the movement, Warren Chalk, Peter Cook, Dennis Crompton, David Greene, Ron Herron, and Michael Webb, became a focal point for the architectural avant-garde, because they redefined the purpose of architecture. Countering the habitual building practice of setting walls and spaces in place, Archigram architects wanted to provide the equipment for amplified living, and they welcomed any cultural rearrangements that would ensue. *Archigram: Architecture without Architecture* -- the first full-length critical and historical account of the Archigram phenomenon -- traces Archigram from its rediscovery of early modernist verve through its courting of students, to its ascent to international notoriety for advocating the "disappearance of architecture."

### Editorial Review

#### Review

Simon Sadler chronicles the encounter between fantastic technology and the built imagination orchestrated by Archigram during a unique decade. The rigorous historical knowledge offered by his book does nothing to lessen the excitement their designs still generate.

(Jean-Louis Cohen, Sheldon H. Solow Professor in the History of Architecture, Institute of Fine Arts, New York University, and Director, Institut français d'architecture, Paris)

Long overdue, Simon Sadler's book finally gives us a meticulous ideological history of the evolution of Archigram, one which will prove invaluable to all future accounts of British architectural culture during the 1960s.

(Kenneth Frampton, Ware Professor of Architecture, Columbia University)

Until recently, no one knew quite where to plug Archigram into the history of 20th-century architecture. Bursting with radical ideas and paper projects about architectural practice and its constructions, it was safely filed under 'the swinging sixties'. But a reevaluation has been under way over the last ten years, showing Archigram to be still influential (more than ever, actually) and still relevant to thinking about the built environment. First came the exhibitions; now this full-length study by Simon Sadler, another first. *Archigram: Architecture Without Architecture* carefully tells the story of this informal grouping of idealistic young architects, and draws lessons for today. Welcome back to the plug-in city....

(Christopher Frayling, Royal College of Art, London)

As a student exactly feel bored to be able to reading. If their teacher inquired them to go to the library or even make summary for some publication, they are complained. Just tiny students that has reading's spirit or real their interest. They just do what the teacher want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that looking at is not important, boring and also can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this Archigram: Architecture without Architecture (MIT Press) can make you experience more interested to read.
