Choral Conducting By Abraham Kaplan

Abraham Kaplan has created a brilliant and practical textbook for choral conducting teachers and students on the college or conservatory level.

Often, during his long and active career in the choral field, the author felt the need for a textbook that streamlined the teaching of a subject that almost defies organization - choral conducting. He searched for a book that would include information on the many facets of the art as well as simple exercises for systematic training in basic conducting skills. In the vast collection of books on choral and orchestral conducting, he did not find on that accomplished these tasks to his satisfaction, so for the past thirty years, he found himself inadvertently writing this book.

His manual allows the instructor to cover every aspect of conducting and rehearsal classroom. Following many of the exercises is a list of choral selections from the standard repertoire which the neophyte conductor may use to practice a particular technical problem within a musical context.
