Photonic Devices By Jia-ming Liu

Covering every major photonic device, this textbook strikes a careful balance between theoretical and practical concepts. The devices it covers include optical fibers, couplers, electro-optic devices, magneto-optic devices, lasers, and photodetectors. The book is well-suited as a text for senior undergraduate and graduate courses, as well as a device-driven engineering reference for professionals.

Editorial Review

Review

"The book is a welcome addition to the field of photonic engineering and is highly recommended as a suitable text for advanced undergraduate and graduate courses in this area." Nicolaas Bloembergen, University of Arizona; Nobel Laureate, Physics, 1981

"Jia-Ming Liu has been thorough in his treatment of this complex subject...In all parts the treatment of the subject is comprehensive and mathematical, but also quite readable with a myriad of diagrams helping to illustrate the points made. The work is aimed at undergraduate and postgraduate students looking to specialize in this field, but will be a useful text for any engineer dealing with these devices."

Philip Bartholemew, IEE Communications Engineer

"This book is excellent."

Professor H. Hamam and Professor M. Guizani

"Liu offers a comprehensive treatment of photonic devices that are suitable for use in optical communications technology."

Choice

About the Author

Jia-Ming Liu is Professor of Electrical Engineering at the University of California, Los Angeles. He received his PhD degree in applied physics from Harvard University in 1982. His research interests are in the areas of non-linear optics, ultrafast optics, photonic devices, optical wave propagation, nonlinear laser dynamics and chaotic communications. Dr Liu has written more than 150 scientific publications and holds 8 US patents. He is a fellow of the Optical Society of America.

Users Review

From reader reviews:

Jewell Garza:

With other case, little individuals like to read book Photonic Devices. You can choose the best book if you like reading a book. Provided that we know about how is important some sort of book Photonic Devices. You can add know-how and of course you can around the world with a book. Absolutely right, due to the fact from book you can learn everything! From your country until foreign or abroad you will be known. About simple point until wonderful thing you could know that. In this era, we are able to open a book or even searching by internet product. It is called e-book. You need to use it when you feel bored to go to the library. Let's read.

John Minnis:

Spent a free the perfect time to be fun activity to complete! A lot of people spent their leisure time with their family, or their particular friends. Usually they doing activity like watching television, going to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Will you something

different to fill your own personal free time/ holiday? Could possibly be reading a book can be option to fill your free time/ holiday. The first thing that you'll ask may be what kinds of guide that you should read. If you want to attempt look for book, may be the publication untitled Photonic Devices can be excellent book to read. May be it might be best activity to you.

Tanya Nolan:

Beside that Photonic Devices in your phone, it might give you a way to get more close to the new knowledge or facts. The information and the knowledge you are going to got here is fresh from oven so don't become worry if you feel like an outdated people live in narrow community. It is good thing to have Photonic Devices because this book offers for your requirements readable information. Do you oftentimes have book but you rarely get what it's all about. Oh come on, that won't happen if you have this inside your hand. The Enjoyable arrangement here cannot be questionable, including treasuring beautiful island. Techniques you still want to miss it? Find this book and also read it from currently!

Dianne Janelle:

Reserve is one of source of knowledge. We can add our information from it. Not only for students but native or citizen want book to know the upgrade information of year to year. As we know those ebooks have many advantages. Beside we add our knowledge, could also bring us to around the world. By book Photonic Devices we can get more advantage. Don't one to be creative people? For being creative person must choose to read a book. Merely choose the best book that suited with your aim. Don't possibly be doubt to change your life by this book Photonic Devices. You can more appealing than now.
