A Conservationist Manifesto By Scott Russell Sanders

As an antidote to the destructive culture of consumption dominating American life today, Scott Russell Sanders calls for a culture of conservation that allows us to savor and preserve the world, instead of devouring it. How might we shift to a more durable and responsible way of life? What changes in values and behavior will be required? Ranging geographically from southern Indiana to the Boundary Waters Wilderness and culturally from the Bible to billboards, Sanders extends the visions of Henry David Thoreau, John Muir, and Rachel Carson to our own day. A Conservationist Manifesto shows the crucial relevance of a conservation ethic at a time of mounting concern about global climate change, depletion of natural resources, extinction of species, and the economic inequities between rich and poor nations. The important message of this powerful book is that conservation is not simply a personal virtue but a public one.

Editorial Review

From Publishers Weekly

In these predictable but frequently insightful essays, Sanders (*Writing from the Center*) muses on how to care for the Earth, local communities and future generations. He condemns the mainstream American way of life as an infantile dream of endless consumption, endless novelty, and endless play and, calling for a dream worthy of grownups, explores ways to realize this dream, such as his own decision to stay put in one place and discover that his ambition was not to make a good career but to make a good life and remain attentive to nature and the present moment. Sanders offers a 40-point Conservationist Manifesto, which, in its thoroughness, thoughtfulness and inclusion of environmental justice issues would serve the environmentalist community well. But the most original and intriguing ideas in this book are Sanders's thoughts about words and their meanings, as when he suggests that for a season we make explicit the meaning of consumers by replacing it with devourers, or that wilderness is a Sabbath of space rather than time, and we need both kinds of Sabbath because Earth could use a respite from our demands. How should we act in response to alarming environmental havoc? As with every great endeavor, such as the abolition of slavery, what's needed is a declaration of values and intent. A manifesto. Sanders, a proven voice of reason and clarity, offers exactly such a document in the hope of shaping an effective green movement. But first he has some stories to share, terms to define, and fresh perspectives to establish. Writing lucidly and stirringly from his home base in Indiana, Sanders views preserving wilderness as a Sabbath in space instead of in time. People who practice an "ethic of restraint" are ark builders because their simpler ways of living are "vessels" holding the wisdom we need to survive the "rising flood" of environmental concerns. Sanders writes crisply about what it really means to call a place home; reminds us of our "common wealth," the living world; and decries "endless consumption." Generosity of spirit and love of life underpin Sanders' 40-point blueprint for ecological health. --Donna Seaman

"*A Conservationist Manifesto* is a rich book and like a rich wine or rich dessert, it is meant to be savored.
