Corrosion Control and Surface Finishing: Environmentally Friendly Approaches From Springer

This book deals with the surface finishing for corrosion prevention from the viewpoint of environmental friendliness. Surface finishing for metallic materials or by metallic materials has excellent corrosion resistance, wear resistance and good color tones, which have been useful for practical applications so far. However, environmental friendliness and user friendliness have become important factors for practical use since the turn of the century. Surface Finishing Industries are now facing a serious crossroad to continue sustainable developments in the future. Sadly, the concept of environmental friendliness is very new, because from the beginning of this discipline (surface finishing), not many people considered the environmental effects so seriously, but sought mainly for the functions, performance, characteristics, and economic profits. Since the biological evaluation processes are very advanced and still debated, this book is very unique and advanced. This book aims to let university students know and learn the concept of environmental friendliness and its relation to surface treatment products based on the fundamental knowledge about conventional corrosion control and surface finishing. The textbook will be used most effectively with subjects such as surface science, surface engineering, mechanical materials, etc. for those studying mechanical engineering, materials engineering and chemical engineering. It is also applicable to practical engineers and researchers in the industrial world as well as the academic one. Throughout this book, readers learn and appreciate the environmentally friendly approaches that are presented for corrosion control and surface finishing.

Throughout this book, readers learn and appreciate the environmentally friendly approaches that are presented for corrosion control and surface finishing.

About the Author

Dr. Hideyuki Kanematsu, Deputy President & Professor in the Department of Materials Science and Engineering at the National Institute of Technology, Suzuka College, Suzuka, Mie, Japan. He is also a fellow of the Institute of Materials Finishing (IMF), Birmingham, U.K.

Dr. Dana M. Barry, Research Professor in Clarkson's Departments of Chemical & Biomolecular Engineering and Electrical & Computer Engineering. She is also the Senior Technical Writer & Editor at the Center for Advanced Materials Processing (CAMP) in Clarkson University, Potsdam, New York, U.S.A.

Users Review

From reader reviews:

Suzanne Macdougall:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each book has different aim or even goal; it means that book has different type. Some people really feel enjoy to spend their time for you to read a book. They are really reading whatever they consider because their hobby is definitely reading a book. Why not the person who don't like examining a book? Sometime, man feel need book whenever they found difficult problem or maybe exercise. Well, probably you will need this Corrosion Control and Surface Finishing: Environmentally Friendly Approaches.

Ernest Maguire:

Spent a free the perfect time to be fun activity to do! A lot of people spent their sparetime with their family, or their friends. Usually they carrying out activity like watching television, gonna beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your personal free time/ holiday? May be reading a book can be option to fill your no cost time/ holiday. The first thing that you'll ask may be what kinds of book that you should read. If you want to try look for book, may be the book untitled Corrosion Control and Surface Finishing: Environmentally Friendly Approaches can be fine book to read. May be it might be best activity to you.

Garnet Veach:

Reading a book being new life style in this season; every people loves to learn a book. When you read a book you can get a lots of benefit. When you read guides, you can improve your knowledge, because book has a lot of information into it. The information that you will get depend on what types of book that you have read. If you want to get information about your examine, you can read education books, but if you want to entertain yourself you can read a fiction books, this kind of us novel, comics, and also soon. The Corrosion Control and Surface Finishing: Environmentally Friendly Approaches provide you with new experience in examining a book.

Ann McLemore:

Is it anyone who having spare time in that case spend it whole day by means of watching television programs or just lying down on the bed? Do you need something new? This Corrosion Control and Surface Finishing: Environmentally Friendly Approaches can be the response, oh how comes? The new book you know. You are consequently out of date, spending your spare time by reading in this fresh era is common not a nerd activity. So what these books have than the others?
