## **SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in Information Systems) By Pericles Antoniades**

Companies have long sought to integrate existing Information Systems (IS) in order to support existing and potentially new business processes spread throughout their “territories” and possibly to collaborating organizations. A variety of designs can be used to this end, ranging from rigid point-to-point electronic data interchange (EDI) interactions to “Web auctions”. By updating older technologies, such as “Internet-enabling” EDI-based systems, companies can make their IT systems available to internal or external customers; but the resulting systems have not proven to be flexible enough to meet business demands. A more flexible, standardized architecture is required to better support the connection of various applications and the sharing of data. Service-Oriented Architecture (SOA) is one such architecture. It unifies (“orchestrates”) business processes by structuring large applications as an ad-hoc collection of smaller modules called “Services”. These applications can be used by different groups of people both inside and outside the company, and new applications built from a mix of services (located in a global repository) exhibit greater agility and uniformity.

Thus, SOA is a design framework for realizing rapid and low-cost system development and improving total system quality. SOA uses the Web Services standards and technologies and is rapidly becoming a standard approach for enterprise information systems integration.

SOA adoption by enterprises has been identified as one of the highest business priorities by a recent Gartner study (Gartner 2007) and enterprises increasingly recognize the requirement for an increased “Service-orientation” and relevant comprehensive frameworks, which will not only help them position themselves and evaluate their SOA initiatives, but also guide them in achieving higher levels of SOA maturity. This in turn, will help enterprises acquire (and retain) competitive advantage over other players in the market who are not (using SOA and thus they are not) so flexibly adjusting themselves to address new business requirements.

This book proposes a new SOA Maturity Model (MM) using a Delphi-variant technique and this constitutes one of its distinguishing features because none of the relevant existing works utilized Delphi. Moreover, the fact that the proposed SOA MM supports inter-enterprise setups makes it even more distinct.

The newly proposed SOA MM is then used to help the participating organizations position themselves in respect to SOA (current status), guide them to achieve higher levels of SOA maturity, and anticipate their SOA maturity in five years' time.

Furthermore, the “local” or “global” nature of the proposed SOA MM is investigated. This is checked firstly against selected expert panel participants and secondly against local business practitioners.

### **Editorial Review**

#### **About the Author**

Dr. Pericles Antoniades has over fourteen years of professional IT experience working for IBM and Oracle, among others, mainly in the areas of Database Management Systems administration and programming, Web Services and Service-Oriented Architecture. He was also a Lecturer at various universities and colleges in Cyprus.

### **Users Review**

#### **From reader reviews:**

##### **Woodrow Harker:**

Why don't make it to become your habit? Right now, try to ready your time to do the important work, like looking for your favorite guide and reading a publication. Beside you can solve your condition; you can add your knowledge by the e-book entitled SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in Information Systems). Try to face the book SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in Information Systems) as your friend. It means that it can to get your friend when you feel alone and beside that course make you smarter than ever. Yeah, it is very fortuned for you. The book makes you a lot more confidence because you can know anything by the book. So , we need to make new experience as well as knowledge with this book.

##### **Lorenzo Brown:**

Book is to be different per grade. Book for children right up until adult are different content. To be sure that book is very important normally. The book SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in Information Systems) ended up being making you to know about other know-how and of course you can take more information. It is rather advantages for you. The publication SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in Information Systems) is not only giving you considerably more new information but also to be your friend when you experience bored. You can spend your spend time to read your guide. Try to make relationship with all the book SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in Information Systems). You never truly feel lose out for everything if you read some books.

##### **Cameron Rodriguez:**

Nowadays reading books become more and more than want or need but also work as a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the particular information inside the book which improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want get more knowledge just go with knowledge books but if you want truly feel happy read one along with theme for entertaining including comic or novel. Typically the SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in

Information Systems) is kind of book which is giving the reader unforeseen experience.

**Madeline Edwards:**

As we know that book is very important thing to add our understanding for everything. By a e-book we can know everything we would like. A book is a range of written, printed, illustrated or perhaps blank sheet. Every year ended up being exactly added. This e-book SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in Information Systems) was filled with regards to science. Spend your extra time to add your knowledge about your research competence. Some people has different feel when they reading the book. If you know how big good thing about a book, you can sense enjoy to read a reserve. In the modern era like today, many ways to get book that you just wanted.
