**Handbook of Burns Volume 2: Reconstruction and Rehabilitation** From  
Brand: Springer Vienna

This volume compiles the perspectives of a multi-author team examining the entire spectrum of burn reconstruction and long-term treatment. Individual chapters cover basic aspects of wound healing and scarring, and those of plastic surgery relating to tissue rearrangement and the use of flaps, as well as the long-term use of skin and skin substitutes. Furthermore, topics such as rehabilitation and scar management are addressed in detail. This part provides detailed reconstruction guidelines divided by anatomic region (e.g. face, hands,...), as well as aspects of future trends and prospects in burn reconstruction, among which are e.g. allotransplantation and bionics.

## **Editorial Review**

### **Review**

From the reviews:

“This second volume of a two-book set on burn care focuses on wound management and ultimate functional outcome. ... Senior trainees or burn care practitioners in surgical or rehabilitation disciplines are an appropriate audience for this work ... A useful overview of stress disorders associated with burn injury is provided. ... Tables, line drawings, and color illustrations are used to good effect and reproduce well. ... This book presents a European perspective on wound healing and burn management.” (David J. Dries, Doody’s Review Service, September, 2012)

### **From the Back Cover**

This volume compiles the perspectives of a multi-author team examining the entire spectrum of burn reconstruction and long-term treatment. Individual chapters cover basic aspects of wound healing and scarring, and those of plastic surgery relating to tissue rearrangement and the use of flaps, as well as the long-term use of skin and skin substitutes.
