### **Projective Ecologies** From ACTAR, Harvard Graduate School of Design

The past two decades have witnessed a resurgence of ecological ideas and ecological thinking in discussions of urbanism, society, culture, and design. The field of ecology has moved from classical determinism and a reductionist Newtonian concern with stability, certainty, and order in favor of more contemporary understandings of dynamic systemic change and the related phenomena of adaptability, resilience, and flexibility. But ecology is not simply a project of the natural sciences. Researchers, theorists, social commentators, and designers have all used ecology as a broader idea or metaphor for a set of conditions and relationships with political, economic, and social implications. Projective Ecologies takes stock of the diversity of contemporary ecological research and theory--embracing Felix Guattari's broader definition of ecology as at once environmental, social, and existential--and speculates on potential paths forward for design practices. Where are ecological thinking and theory now? What do current trajectories of research suggest for future practice? How can advances in ecological research and modeling, in social theory, and in digital visualization inform, with greater rigor, more robust design thinking and practice?

New original essays by Peter Del Tredici, Erle Ellis, Christopher Hight, Sanford Kwinter, Sean Lally, Nina-Marie Lister, Chris Reed, Jane Wolff

Reprinted/excerpted essays by Robert Cook, David Fletcher, Richard T.T. Forman, C.S. Holling.

With drawings by, Gross.MAX, James Corner, Field Operations, Sean Lally, Anuradha Mathur and Dilip DaCunha, OMA, Stoss Landscape Urbanism, West 8.

## **Editorial Review**

### **Review**

AN AMERICAN SOCIETY OF LANDSCAPE ARCHITECTS (ASLA) BEST BOOK OF 2014:

This new collection of essays, edited by Chris Reed, ASLA, founder of Stoss Landscape Urbanism, and Nina-Marie Lister, Affil. ASLA, professor at Ryerson University, is a timely overview of contemporary thinking about ecology and design.

### **From the Author**

The book is organized conceptually, moving from critical foundations to the connections between nature and culture, the relationship between urban design and ecology, and, finally, to new ways of unifying ecology and design. Previously-published seminal essays in ecological and design theory are interspersed with new contributions, effectively reframing and clarifying some of the concepts explored in the landscape urbanism movement. Projective Ecologies uses ecology as a lens for understanding the role of design in a complex, interconnected, and changing world.

### **From the Inside Flap**

Ecological research applied to current architectural practice

## **Users Review**

### **From reader reviews:**

#### **Mary Torres:**

The book Projective Ecologies can give more knowledge and also the precise product information about everything you want. Why must we leave the good thing like a book Projective Ecologies? Several of you have a different opinion about e-book. But one aim this book can give many data for us. It is absolutely appropriate. Right now, try to closer together with your book. Knowledge or information that you take for that, you may give for each other; you are able to share all of these. Book Projective Ecologies has simple shape but you know: it has great and big function for you. You can search the enormous world by wide open and read a book. So it is very wonderful.

#### **Guadalupe Eggleston:**

In this 21st millennium, people become competitive in each way. By being competitive right now, people have do something to make these survives, being in the middle of the crowded place and notice by surrounding.
