The Ecological World View By Charles J. Krebs

This new textbook fills an important niche by offering a lively overview of the principles of ecology for a broad range of university-level science and biology courses. Written for those who need to understand key ecological concepts but may specialise in other fields, it is filled with many vivid examples of topical issues and current events.

The Ecological World View briefly covers the history of ecology and describes the general approach of the scientific method, then takes a wide-ranging look at basic principles of population dynamics and applies them to everyday practical problems.

Each chapter clearly presents key concepts and learning objectives, combined with thought-provoking, open-ended questions to facilitate discussion.

Stimulating, appealing and written in non-technical language, this is an essential resource for understanding how the ecological world works.

Editorial Review

Review

"A lively overview . . . that can be used to teach both science majors and non-science majors at the college level. . . . Written in a nontechnical language, yet it covers the history of ecology and its scientific methodology accurately and lucidly."--*Bioscience*

"Provides clear explanations of the major ideas in ecology." --*Ecology*

About the Author

Charles Krebs is Emeritus Professor of Zoology at the University of British Columbia and Professor in Ecology at the Institute for Applied Ecology, University of Canberra. He is author of *Ecology: the Experimental Analysis of Distribution and Abundance* (fifth edition) and *Ecological Methodology* (second edition), among other books.

Users Review

From reader reviews:

Steven Anderson:
