Portal Hypertension VI: Proceedings of the Sixth Baveno Consensus Workshop: Stratifying Risk and Individualizing Care From Springer

This book will be an excellent tool for practitioners seeking an update on the latest developments in the diagnosis and management of cirrhosis and portal hypertension. Among the topics addressed are risk stratification, prognosis, screening and surveillance, impact of etiological and antifibrotic therapy, the gut microbiome and cirrhosis, prevention of decompensation/further decompensation, management of the acute bleeding episode, controversies in pediatrics, and vascular diseases of the liver in cirrhotic and noncirrhotic portal hypertension. The book is a compilation of lectures and important consensus statements from the Sixth Baveno International Consensus Workshop on Portal Hypertension, the most recent of a series of workshops held every 5 years for hepatologists with an interest in the field. Portal Hypertension VI will serve as a reference book for clinical and research fellows in Gastroenterology and Hepatology and should inspire new research projects in the areas identified as promising by the experts of the Baveno VI Faculty.

Editorial Review

From the Back Cover

This book will be an excellent tool for practitioners seeking an update on the latest developments in the diagnosis and management of cirrhosis and portal hypertension. Among the topics addressed are risk stratification, prognosis, screening and surveillance, impact of etiological and antifibrotic therapy, the gut microbiome and cirrhosis, prevention of decompensation/further decompensation, management of the acute bleeding episode, controversies in pediatrics, and vascular diseases of the liver in cirrhotic and noncirrhotic portal hypertension. The book is a compilation of lectures and important consensus statements from the Sixth Baveno International Consensus Workshop on Portal Hypertension, the most recent of a series of workshops held every 5 years for hepatologists with an interest in the field. Portal Hypertension VI will serve as a reference book for clinical and research fellows in Gastroenterology and Hepatology and should inspire new research projects in the areas identified as promising by the experts of the Baveno VI Faculty.

About the Author

Roberto de Franchis is Head of the Gastroenterology Unit at the L. Sacco University Hospital, Milan, Italy and Professor of Medicine (Gastroenterology) at the University of Milan. He is a member of several specialist societies and an elected Fellow of the American Gastroenterological Association. Dr. de Franchis has published widely in the fields of Gastroenterology and Hepatology in the major medical and hepatology journals. Every five years since 1990 he has organized the International Consensus Workshop on Definitions, Methodology, and Therapeutic Strategies in Portal Hypertension in Baveno, Italy. In 2010 he was organizer and co-chairman of the European School of Hepatology (EASL) in Barcelona, Spain.

Users Review

From reader reviews:

Guy Gregory:

Information is provisions for those to get better life, information these days can get by anyone on everywhere. The information can be a knowledge or any news even restricted. What people must be consider while those information which is in the former life are hard to be find than now is taking seriously which one is suitable to believe or which one often the resource are convinced. If you receive the unstable resource then you have it as your main information it will have huge disadvantage for you. All those possibilities will not happen with you if you take Portal Hypertension VI: Proceedings of the Sixth Baveno Consensus Workshop: Stratifying Risk and Individualizing Care as your daily resource information.
