Biology of Fishes By Quentin Bone, Richard Moore

The Third Edition of *Biology of Fishes* is chiefly about fish as remarkably efficient machines for coping with the many problems that life in water entails, and looks at many such special cases. Fishes form the largest group of vertebrates, with around 20,000 known species, and they display a remarkable diversity of size, shape, internal structure and ecology to cope with environments ranging from transient puddles to the abyssal depths of the sea.

Biology of Fishes does not try to cover all aspects of fish biology, but focuses on the ingenious ways in which fish have resolved the particular problems that come from living in water, especially body fluid regulation, locomotion, feeding mechanisms, and sensory systems. Enough detail is provided for the reader to be able to go on and use primary research papers. Each chapter has been thoroughly updated and a new chapter on the immune system has been added.

This is an ideal textbook for students of fish biology and any of the branches of aquatic biology. Given its skilful combination of breadth and detail, the book also provides a manageable review of fish biology for experienced biologists.

Users Review

From reader reviews:

Susan Swain:

Do you one among people who can't read satisfying if the sentence chained from the straightway, hold on guys this specific aren't like that. This Biology of Fishes book is readable simply by you who hate the straight word style. You will find the facts here are arrange for enjoyable looking at experience without leaving also decrease the knowledge that want to give to you. The writer involving Biology of Fishes content conveys thinking easily to understand by most people. The printed and e-book are not different in the written content but it just different available as it. So , do you nonetheless thinking Biology of Fishes is not loveable to be your top list reading book?

Deborah Anderson:

Reading a reserve tends to be new life style with this era globalization. With reading through you can get a lot of information which will give you benefit in your life. Using book everyone in this world can certainly share their idea. Textbooks can also inspire a lot of people. A great deal of author can inspire their very own reader with their story or their experience. Not only the storyline that share in the publications. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors in this world always try to improve their proficiency in writing, they also doing some exploration before they write with their book. One of them is this Biology of Fishes.

Omar Lamm:

People live in this new time of lifestyle always try to and must have the extra time or they will get great deal of stress from both everyday life and work. So , whenever we ask do people have extra time, we will say absolutely indeed. People is human not really a huge robot. Then we consult again, what kind of activity are you experiencing when the spare time coming to you of course your answer can unlimited right. Then do you try this one, reading books. It can be your alternative with spending your spare time, often the book you have read is usually Biology of Fishes.

Jeffrey Call:

That reserve can make you to feel relax. This book Biology of Fishes was vibrant and of course has pictures on the website. As we know that book Biology of Fishes has many kinds or category. Start from kids until youngsters. For example Naruto or Private eye Conan you can read and feel that you are the character on there. Therefore , not at all of book usually are make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading in which.
