Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) By Elaine N. Marieb, Lori A. Smith

For the one-semester human anatomy laboratory course.

Get the most out of your human anatomy lab

With 30 exercises covering all body systems, a clear, engaging writing style, and full-color illustrations, **Human Anatomy Laboratory Manual with Cat Dissections**, Eighth Edition provides everything needed for a successful lab experience. This edition features new **Visual Summary Tables** for presenting complex information, new “**Why This Matters**” boxes that help relate the lab activity to a real-life or clinical example, new colored **Review Sheet art**, and new full-color, **body movement photos**.

Editorial Review

About the Author

For **Elaine N. Marieb**, taking the student's perspective into account has always been an integral part of her teaching style. Dr. Marieb began her teaching career at Springfield College, where she taught anatomy and physiology to physical education majors. She then joined the faculty of the Biological Science Division of Holyoke Community College in 1969 after receiving her Ph.D. in zoology from the University of Massachusetts at Amherst. While teaching at Holyoke Community College, where many of her students were pursuing nursing degrees, she developed a desire to better understand the relationship between the scientific study of the human body and the clinical aspects of the nursing practice. To that end, while continuing to teach full time, Dr. Marieb pursued her nursing education, which culminated in a Master of Science degree with a clinical specialization in gerontology from the University of Massachusetts. It is this experience that has informed the development of the unique perspective and accessibility for which her publications are known.

Dr. Marieb has partnered with Benjamin Cummings for over 30 years. Her first work was *Human Anatomy & Physiology Laboratory Manual* (Cat Version), which came out in 1981. In the years since, several other lab manual versions and study guides, as well as the softcover *Essentials of Human Anatomy & Physiology* textbook, have hit the campus bookstores. This textbook, now in its 10th edition, made its appearance in 1989 and is the latest expression of her commitment to the needs of students studying human anatomy and physiology.

Dr. Marieb has given generously to colleges both near and far to provide opportunities for students to further their education. She contributes to the New Directions, New Careers Program at Holyoke Community College by funding a staffed drop-in center and by providing several full-tuition scholarships each year for women who are returning to college after a hiatus or attending college for the first time and who would be unable to continue their studies without financial support. She funds the E. N. Marieb Science Research Awards at Mount Holyoke College, which promotes research by undergraduate science majors, and has underwritten renovation and updating of one of the biology labs in Clapp Laboratory at that college. Dr. Marieb also contributes to the University of Massachusetts at Amherst where she generously provided funding for reconstruction and instrumentation of a cutting-edge cytology research laboratory. Recognizing the severe national shortage of nursing faculty, she underwrites the Nursing Scholars of the Future Grant Program at the university.

In 1994, Dr. Marieb received the Benefactor Award from the National Council for Resource Development, American Association of Community Colleges, which recognizes her ongoing sponsorship of student scholarships, faculty teaching awards, and other academic contributions to Holyoke Community College. In May 2000, the science building at Holyoke Community College was named in her honor.

Dr. Marieb is an active member of the Human Anatomy and Physiology Society (HAPS) and the American Association for the Advancement of Science (AAAS). Additionally, while actively engaged as an author, Dr. Marieb serves as a consultant for the Benjamin Cummings Interactive Physiology® CD-ROM series.

When not involved in academic pursuits, Dr. Marieb is a world traveler and has vowed to visit every country on this planet. Shorter term, she serves on the scholarship committee of the Women's Resources Center and

on the board of directors of several charitable institutions in Sarasota County. She is an enthusiastic supporter of the local arts and enjoys a competitive match of doubles tennis.

Lori A. Smith received her Ph.D. in Biochemistry from the University of California at Davis. Before discovering her passion for teaching, she worked as a research scientist and project leader in the medical diagnostics industry. In 1999, she joined the faculty at American River College in the Biology Department. Currently she teaches anatomy and physiology and microbiology to pre-nursing and mortuary science students at American River College. Starting in 2005, she began co-authoring Pearson's *PhysioEx: Laboratory Simulations in Physiology* and has continued to co-author several versions of the software and lab manual. She is also co-authoring Pearson's *Human Anatomy & Physiology* Lab Manual. Dr. Smith has been awarded "Instructor of the Year" by the American River College Associated Students for her commitment to serving students, and she is a member of the Human Anatomy and Physiology Society (HAPS) and the National Association of Biology Teachers (NABT).

Users Review

From reader reviews:

Tonya Deschamps:

Playing with family in a park, coming to see the water world or hanging out with pals is thing that usually you may have done when you have spare time, subsequently why you don't try point that really opposite from that. One activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Human Anatomy Laboratory Manual with Cat Dissections (8th Edition), you may enjoy both. It is great combination right, you still want to miss it? What kind of hangout type is it? Oh can occur its mind hangout men. What? Still don't obtain it, oh come on its called reading friends.

Pamela Edmonds:

Are you kind of active person, only have 10 or 15 minute in your moment to upgrading your mind expertise or thinking skill possibly analytical thinking? Then you have problem with the book as compared to can satisfy your small amount of time to read it because this time you only find publication that need more time to be examine. Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) can be your answer since it can be read by you who have those short time problems.

Vincent Johnson:

The book untitled Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) contain a lot of information on the item. The writer explains your ex idea with easy way. The language is very simple to implement all the people, so do not necessarily worry, you can easy to read the idea. The book was compiled by famous author. The author will bring you in the new age of literary works. You can read this book because you can read more your smart phone, or product, so you can read the book throughout anywhere and anytime.
