### Editorial Review

From Publishers Weekly

The landmark 1969: the first year of the Nixon presidency; the year in which the U.S. death toll in Vietnam exceeded that of the Korean War; the year of Chappaquidick--and the year of Woodstock, the three-day music festival that Margaret Mead reportedly called "the best-planned and most significant gathering of young people in the history of the world." Makower, a freelance journalist, attempts the formidable task of interpreting Woodstock by setting it squarely within its historical context and interviewing scores of participants, among them musicians, neighbors (both the hostile and the amicable) and employees at the food concessions . From the first tentative conversations between its four producers (Michael Lang, Joel Rosenman, John Roberts and Artie Kornfeld) to the lingering aftermath--the grounds, for a weekend the third-largest city in New York, were afterward declared a disaster area--from the interminable security and lavatory arrangements to the "freak-out" tents and the lawsuits from locals, Woodstock comes alive here, even if the music itself seems almost incidental to the backstage dramas. From Library Journal

Letting over 100 attendees and others who made it happen just tell it like it was, Makower has compiled a massive literary birthday cake for Woodstock's 20th anniversary. Far wider in scope than Jack Curry's *Woodstock: The Summer of Our Lives* ( LJ 3/15/89), this oral history offers page after page of commentary from a cross-section of those connected with it. After writing two pages of preface, Makower never again intervenes; and while one can appreciate his aim, the massiveness of the project called for more direction: keeping track of the huge number of personalities is finally burdensome. Ultimately, this well-illustrated compilation may be of greatest use as a reference tome for 1960s scholars. Small libraries can get by with just the Curry book. More comprehensive collections will want Makower's as well because of its research value.

About the Author

Baron Wolman began the music phase of his photographic career in 1967, as the very first photographer for the new Rolling Stone magazine. He went on to capture the 60s pop rock explosion, including: Janis Joplin, the Rolling Stones, the Who, Jimi Hendrix, Pink Floyd, Bob Dylan amongst many more. "I see myself as a kind of voyeur ... I'm happiest when I'm invisible and watching. I just love to watch. I'm a chameleon and can adapt myself to the situation, and that, to me, is one of the gifts that I was given naturally, and that's how you get honest pictures."
