**Reconstructing Quaternary Environments** By J. John Lowe, Michael J.C Walker

This third edition of *Reconstructing Quaternary Environments* has been completely revised and updated to provide a new account of the history and scale of environmental changes during the Quaternary. The evidence is extremely diverse ranging from landforms and sediments to fossil assemblages and geochemical data, and includes new data from terrestrial, marine and ice-core records. Dating methods are described and evaluated, while the principles and practices of Quaternary stratigraphy are also discussed. The volume concludes with a new chapter which considers some of the key questions about the nature, causes and consequences of global climatic and environmental change over a range of temporal scales. This synthesis builds on the methods and approaches described earlier in the book to show how a number of exciting ideas that have emerged over the last two decades are providing new insights into the operation of the global earth-ocean-atmosphere system, and are now central to many areas of contemporary Quaternary research.

This comprehensive and dynamic textbook is richly illustrated throughout with full-colour figures and photographs. The book will be of interest to undergraduates, postgraduates and professionals in Earth Science, Environmental Science, Physical Geography, Geology, Botany, Zoology, Ecology, Archaeology and Anthropology

## **Editorial Review**

### Review

"This is a splendid compendium of what we know and understand about Quaternary environments, and how we study them. Lowe and Walker are to be congratulated on this fully updated version of their popular textbook. *Reconstructing Quaternary Environments* continues to be a must for Quaternary sciences courses at all university levels and an indispensable reference source for professional geoscientists. This new edition is beautifully illustrated and provides diverse examples from around the world; it is a real *tour de force* of Quaternary studies."

Professor Lewis Owen, Department of Geology, University of Cincinnati, USA

"The literature in Quaternary environmental and climatic change has increased exponentially during the last decades and now covers a wide range of archives, proxies and modelling studies. In this revised and updated 3rd edition, Lowe and Walker have successfully integrated the wealth of new data from around the world. The up-to-date information and references, the elegant language, the explanatory notes after each chapter and full-colour illustrations and photos all serve to make this wonderful textbook a treasure trove for students, researchers and anyone else interested in finding out more about the exciting subject of Quaternary climate and environmental change."

**Professor Barbara Wohlfarth, Department of Geological Sciences, Stockholm University, Sweden**

"The third edition of *Reconstructing Quaternary Environments* by John Lowe and Mike Walker continues the impressive standards set by its two predecessor volumes. Well written, extensively referenced and with numerous clear diagrams and colour figures, it sets the standard for textbooks on Quaternary science and the techniques to reconstruct environmental change. It should be essential reading for students and will be an invaluable reference for all those with an interest in the Quaternary."

**Professor Colm O'Cofaigh, Department of Geography, Durham University, UK**

"A good reference for courses (if complemented by a work with better focus on the human record) and a general introduction to this topic. Summing Up: Recommended. Upper-division undergraduates, graduate students, researchers/faculty."

**CHOICE, E. Delson, CUNY Herbert H. Lehman College**

### About the Author

**John Lowe** is former Gordon Manley Professor of Geography and Quaternary Science, and now Emeritus Professor of Quaternary Science, Royal Holloway University of London.

**Mike Walker** is Emeritus Professor of Quaternary Science, School of Archaeology, History and Anthropology at Trinity Saint David, University of Wales, Lampeter, and Honorary Professor, Aberystwyth University.

## **Users Review**

### **From reader reviews:**

#### **Robert Marques:**

In this 21st century, people become competitive in each and every way. By being competitive right now, people have to do something to make themselves survive, being in the middle of the crowded place and notice simply by surrounding. One thing that at times many people have underestimated that for a while is reading. Yes, by reading a e-book your ability to survive enhance then having chance to stand up than other is high. To suit your needs who want to start reading the book, we give you this kind of Reconstructing Quaternary Environments book as nice and daily reading e-book. Why, because this book is more than just a book.

#### **Clayton Medina:**

Now a day individuals who Living in the era wherever everything reachable by connect with the internet and the resources in it can be true or not call for people to be aware of each information they get. How people have to be smart in getting any information nowadays? Of course the answer then is reading a book. Looking at a book can help men and women out of this uncertainty Information mainly this Reconstructing Quaternary Environments book since this book offers you rich facts and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it you probably know this.

#### **Jeff Farley:**

The actual book Reconstructing Quaternary Environments will bring someone to the new experience of reading a book. The author style to explain the idea is very unique. In the event you try to find new book to see, this book very appropriate to you. The book Reconstructing Quaternary Environments is much recommended to you to see. You can also get the e-book in the official web site, so you can more readily to read the book.

#### **Doug Campbell:**

Reading a guide make you to get more knowledge from this. You can take knowledge and information coming from a book. Book is composed or printed or descriptive from each source that filled update of news. Within this modern era like at this point, many ways to get information are available for you actually. From media social like newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just in search of the Reconstructing Quaternary Environments when you necessary it?
