Starting Out with Programming Logic and Design (4th Edition) By Tony Gaddis

For introductory courses in Computer Programming.

The Fundamentals of Programming

When it comes to programming, understanding the founding concepts can greatly improve student engagement and future success. In its **Fourth Edition**, *Starting Out with Programming Logic and Design* is a language-independent introductory programming book, ideal for a precursor programming course or the first unit of an introductory programming course. The text covers fundamental topics such as data types, variables, input, output, control structures, modules, functions, arrays, files, object-oriented concepts, GUI development, and event-driven programming.

Designed for beginners, the text is clear and approachable, making the complex concepts accessible to every student. In this edition, Gaddis uses updated, contemporary examples to familiarize students with models and logical thought processes used in programming without further complicating them with language syntax. By using easy-to-understand pseudocode, flowcharts, and other tools, Gaddis illustrates how to design the logic of programs. Then, confident in their high-level understanding of computer programming, students are able to handle programming languages and syntax with greater ease and aptitude.

Editorial Review

About the Author

Tony Gaddis is the principal author of the Starting Out With . . . series of textbooks. Tony has twenty years of experience teaching computer science courses, primarily at Haywood Community College. He is a highly acclaimed instructor who was previously selected as the North Carolina Community College “Teacher of the Year” and has received the Teaching Excellence award from the National Institute for Staff and Organizational Development. The Starting Out With . . . series includes introductory books covering Programming Logic and Design, C++, Java, Microsoft® Visual Basic, C#®, Python, and Alice, all published by Pearson.

Users Review

From reader reviews:

Jennifer Oaks:

Nowadays reading books be a little more than want or need but also get a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge the rest of the information inside the book in which improve your knowledge and information. The info you get based on what kind of e-book you read, if you want have more knowledge just go with education books but if you want sense happy read one using theme for entertaining for instance comic or novel. The actual Starting Out with Programming Logic and Design (4th Edition) is kind of e-book which is giving the reader unforeseen experience.

Jennifer Dillon:

Playing with family in a park, coming to see the marine world or hanging out with buddies is thing that usually you may have done when you have spare time, then why you don't try factor that really opposite from that. One particular activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Starting Out with Programming Logic and Design (4th Edition), you may enjoy both. It is fine combination right, you still would like to miss it? What kind of hang-out type is it? Oh can occur its mind hangout fellas. What? Still don't get it, oh come on its identified as reading friends.

Gloria White:

Do you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Try and pick one book that you just dont know the inside because don't evaluate book by its deal with may doesn't work here is difficult job because you are scared that the inside maybe not because fantastic as in the outside search likes. Maybe you answer may be Starting Out with Programming Logic and Design (4th Edition) why because the fantastic cover that make you consider with regards to the content will not disappoint anyone. The inside or content is usually fantastic as the outside or perhaps cover. Your reading sixth sense will

directly direct you to pick up this book.

Heather Stewart:

Reading a book for being new life style in this calendar year; every people loves to learn a book. When you learn a book you can get a lots of benefit. When you read guides, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. In order to get information about your analysis, you can read education books, but if you act like you want to entertain yourself read a fiction books, these us novel, comics, and also soon. The Starting Out with Programming Logic and Design (4th Edition) will give you new experience in examining a book.
