Neuroimmunology (What Do I Do Now?) By Aaron E. Miller, Tracy M. DeAngelis

What Do I Do Now? Patients with neuroimmunological syndromes pose many clinical challenges for the attending physician. Even experienced clinicians occasionally arrive at the point where diagnostic, work-up, treatment, or prognostic thinking becomes blocked.

Neuroimmunology is a practical and accessible guide for both common and not-so-common neuroimmunological syndromes. Comprised of a collection of thirty short case vignettes, the information is presented in an easily digestible format that consists of a discussion highlighting the topic in question as well as an answer and advice section. These discussions are followed by a brief "take home" message emphasizing the clinical, diagnostic, and therapeutic pearls of the case. *Neuroimmunology* is the go-to resource for primary care physicians, neurologists and subspecialists who encounter central and peripheral demyelinating diseases, vasculitis, and other immune system related neurological disorders.

Editorial Review

Review

"[*Neuroimmunology*], using a case report format, succinctly and clearly presents the most recent knowledge on the diagnostic approach and the best treatment of the entire spectrum of autoimmune disorders that affect the nervous system both informative and entertaining." -- Jerome B. Posner, MD, Evelyn Frew American Cancer Society Clinical Research Professor, Memorial Sloan-Kettering Cancer Center, New York, NY

"Neurology residents, neurologists preparing for board examinations as well as active clinical neurologists will frequently take this volume from their bookshelf to help guide their diagnosis and treatment. The authors are to be congratulated for a fine addition to the neurologic literature." -- Don Gilden, MD, Louise Baum Endowed Chair and Professor, Department of Neurology, University of Colorado School of Medicine, Aurora, CO
